

How Much Is Data Prep Costing You?

(Hint: More Than You Think)

Trifacta's global survey of nearly 300 data professionals shows that poor data prep practices:

Waste Resources

Delay Valuable Insights

Bad Data Prep Costs Billions

65%

of IT pros spend at least half of their time on data QA, cleanup or preparation.

That equates to over¹

\$450 billion lost

And your people notice.

58%

of analysts believe that this work time costs their organizations money more than it delivers value.

Inefficiencies are Delaying Valuable Insights

82%

of analysts go back to IT with new requirements *after* the data is prepared

40%

of IT pros spend half their data prep time on revising or reworking data requirements

Manual Data Preparation is a Big Part of the Problem

37%
of data analysts

Use Excel more than other tools to prepare data

30%
of IT pros

"Which of Dante's circles is Excel Hell?"

A New Approach to Data Preparation

Automated and intelligent data preparation

more efficient data prep

fewer wasted resources

happier IT professionals and analysts

better data insights

Automation tools can **empower** data analysts to more **easily** and **efficiently** work with diverse and fragmented data while freeing up IT professionals to focus on more strategic work.
